Improving the quality of working life A challenge for standardization, testing and certification

5th European Conference on standardization, testing
and certification in the field of occupational safety and health

14-16 October 2015 Seville (Spain)
www.euroshnet.eu

On behalf of the EUROSHNET organizing committee, I have the honour of inviting you to the 5th European conference on standardization, testing and certification in the field of occupational safety and health (OSH). The conference will be held in Seville on 14-16 October 2015. It is aimed at manufacturers and users of products, European and national authorities, OSH experts, and other stakeholders having an interest in health and safety at work.

The focus of the 5th conference organized by the EUROSHNET network will be on the need to create conditions for improving the quality of working life in a rapidly changing world: How can standardization, testing and certification contribute? Which pitfalls should be avoided?

With your support and cooperation we shall find ways to complete the jigsaw puzzle of the numerous – and sometimes contradictory – requirements that we must face in the next 10 years.

As the Director of INSHT, it will be my great pleasure to welcome you to the beautiful city of Seville to try and meet that challenge.

M^a Dolores Limón Tamés

Director of the Instituto Nacional de Seguridad e Higiene en el Trabajo (INSHT)

Objectives

- Stimulating interaction between stakeholders concerned with OSH issues in Europe
- Providing an update on EU standardization and certification policy
- Discussing how standardization, testing and certification can contribute to improving the quality of working life

The interactive programme design will enable participants to provide input and get involved in the discussions throughout the conference.

Invited lecturers will report on developments in European OSH policy and product safety, and discuss the opportunities and limits of standardization, testing and certification for safety, health and well-being at work.

A full afternoon will be devoted to workshops addressing a range of topical subjects connected with the focus of the conference.

Who should participate

- OSH experts
- European and national authorities
- National OSH institutes
- Social partners
- Manufacturers, importers and users of products
- Accident insurance organizations
- Testing and certification bodies
- Standardization organizations

Date and venue

14-16 October 2015

HOTEL BARCELÓ RENACIMIENTO, SEVILLE

<http://en.hotelbarcelorenacimiento.com>

The hotel is located at the shores of the Guadalquivir and offers conference facilities, spacious rooms and gardens. Its modern design makes it an attractive venue.

Seville is the capital city of Andalusia. Located in the South of Spain, it is one of the largest Spanish cities and occupies the valley of the Guadalquivir River.

Seville's rich history has left the city stuffed with innumerable monuments like the awesome cathedral, the third largest in the world, the Giralda tower, the wonderful palace of the Royal Alcázar, the magical Barrio of Santa Cruz with its narrow streets, or the Maestranza bullfighting ring. The city of Seville is famous worldwide for its culture, monuments, traditions, artistic heritage and passion for Flamenco but what it's essentially famous for is its own living self.

The average maximum temperature in October in Seville is 25°C.

Call for posters

A poster exhibition will be organized in parallel to the conference. Please check the conference website for details:
